Berlin, 13469, Germany

Senior Mobile Engineer with 5+ years of experience developing scalable cross-platform applications using Flutter and native Android. Experienced in designing production-ready mobile architectures using Clean Architecture, BLoC/Cubit state management, and modern CI/CD pipelines. Skilled in integrating REST APIs, payment systems, and cloud services to deliver high-performance applications across iOS, Android, and Web platforms.

SKILLS

- **Mobile Development:** Flutter**,** Dart, Java, Kotlin, Android SDK.
- **Architecture & State Management:** Clean Architecture, MVVM, SOLID Principles, Dependency Injection, Bloc/Cubit.
- **Networking**: REST APIs, GraphQL, Firebase, WebSockets.
- **Offline Mode:** Hive, Drift(SQLite), NoSQL
- **Payment & Integration:** Stripe, In-App Purchases, Payment Web-hooks
- **Testing:** Unit Testing, Widget Testing, UI Testing,
- **DevOps & CI/CD:** Git, GitHub Actions, Codemagic, TestFlight, App Store/ Play Store Publication
- **Tools:** GitHub, Bitbucket, Jira, Figma
- **Project Management:** Agile / Scrum methodologies

EXPERIENCE

Aug 2024 – Present

Senior Flutter Developer (Founding Engineer), Diverse Dreamse AI — Berlin, Germany

- Architected and developed a scalable AI-powered storytelling platform using Flutter for Web, iOS, and Android, implementing Clean Architecture and **BLoC/Cubit** state management to ensure modular and maintainable codebases.
- Integrated OpenAI APIs for dynamic story and image generation, enabling automated personalized content creation and reducing manual content production effort by over **60%**.
- Designed and implemented a subscription-based monetization system using **Stripe**, including payment processing, webhooks, and subscription lifecycle management across web and mobile platforms.
- Implemented **offline-first architecture** using Hive and caching strategies, improving application reliability in low-connectivity environments and reducing API dependency by **30%**.
- Established automated **CI/CD** pipelines using **GitHub Actions** and **Codemagic**, reducing manual build and deployment effort by **40%** and enabling consistent release workflows.
- Collaborated with product and design teams to define scalable feature architecture and translate UX specifications into reusable Flutter components.
- Developed an internal admin dashboard for analytics, payment tracking, user management, and operational insights.
- Diverse Dreams AI App : Diverse Dreams AI

May 2023 – July 2024

Flutter Developer (Android / IOS), HEIDI GmbH — Salzkoten, Germany

- Developed and maintained a production Smart City mobile application using Flutter for Android and iOS, supporting citizen access to local services and public information.
- Implemented **Clean Architecture with BLoC/Cubit state management**, improving maintainability and reducing feature integration complexity by **25%**.

- Integrated **REST APIs** using **Dio** with structured error handling and dependency injection, improving data reliability and reducing network-related failures.
- Collaborated with UX designers to convert **Figma** prototypes into responsive Flutter UI components**,** ensuring consistent user experience across devices.
- Participated in **CI/CD** workflows and automated deployment pipelines for App Store and Google Play releases.
- Optimized application performance and resolved runtime issues, improving app stability and reducing crash reports by approximately **20%**.
- Geseke App (Smart City app): GESEKE App.

Jan 2021 – April 2023

Flutter Developer (Android / IOS), Mintellity GmbH

Munster, Germany

- Developed cross-platform Flutter applications for booking and event management platforms used by thousands of users across Android and iOS devices.
- Implemented **Clean Architecture** and **BLoC** state management, improving code modularity and enabling faster feature development cycles.
- Integrated **GraphQL** and **REST APIs** to support efficient data synchronization between mobile applications and backend services.
- Implemented mobile database solutions using **Hive** and **Drift (SQLite)** for local storage and offline data persistence.
- Integrated **Google Maps, Firebase push notifications,** and **payment systems** including PayPal, Apple Pay, and Google Pay.
- Conducted **unit testing and feature validation**, improving application reliability and reducing post-release defects.
- Dance Flavors (Dance class booking app): Dance Flavors.

Sept 2019 – Dec 2020

Android Developer (Kotlin), WAPP GmbH

Bielefeld, Germany

- Developed native Android applications using **Kotlin** and **MVVM architecture** for enterprise client projects.
- Integrated **REST APIs** and asynchronous data handling to support real-time mobile application functionality.
- Translated UI/UX designs into responsive Android interfaces using **Android SDK** and **Kotlin**.
- Collaborated with designers and backend engineers to deliver production-ready mobile features.

EDUCATION

Mar 2019 – Mar 2023
MSc. Computer Science, University Paderborn Paderborn, Germany

Mar 2014 – Mar 2018
BSc. Computer Science, Bahria University Karachi, Pakistan

Languages

English – Professional Proficiency
German – Intermediate
